

Press Release

Cogenco's supply and framework agreement success

7th September, 2006 Horsham, West Sussex. Cogenco Limited has been awarded a comprehensive Framework Agreement with Yorkshire Water. Under the Agreement Cogenco will supply, install and maintain four new Combined Heat and Power (CHP) units in addition to fourteen existing units. The CHP units all operate on a renewable fuel - biogas which is generated by Yorkshire Water from their waste water treatment programme.

Cogenco's maintenance monitoring system operates 24/7 and provides expert technical support 365 days a year from Cogenco's Service Desk at its' Horsham headquarters which ensures maximum reliability and availability.

With one of the largest CHP field service teams in the UK, Cogenco's engineers are highly trained and are committed to providing an exceptional level of maintenance service.

Yorkshire Water as part of environmental performance targets, have focused on cutting their energy consumption, improving energy efficiency and reducing carbon emissions. Combined heat and power is a proven way of making substantial financial and environmental savings which are further enhanced due to the use of biogas as a fuel.

Damian Shevloff, UK Sales Manager commented "we are delighted to be in the position of not only supplying new CHP units to Yorkshire Water but also to manage all Yorkshire Water's existing fleet under the comprehensive Framework Agreement".

UK Headquarters in Horsham, West Sussex. Cogenco Limited, a leading cogeneration (CHP - Combined Heat and Power) energy solution provider. Delivering a personal and flexible approach to cogeneration with engineering expertise backed by the largest dedicated service team in the industry. For more information visit www.cogenco.com
